Business Model

LAND ACQUISITION

- Acquisition of raw land ideally during the low point of the cycle
- Acquisition of underutilized land or brownfield development opportunities when investment opportunities arise

ENTITLEMENT PROCESS

 Obtain approvals necessary to develop land for specific purposes and bring raw land to the finished lot stage by obtaining regulatory approval for a particular use

- DEVELOP LAND
- Create fully serviced lots (Canada and U.S.) or graded lots (U.S. only)

Install utilities, construct roads, sidewalks, parks etc.

MONETIZE CONSUMER & COMMERCIAL DELIVERABLES

We will build homes on a portion of our land.

SELL LOTS

The balance of lots are sold to and built on by third-party builders.

COMMERCIAL ZONES

We build commercial areas in select developments.

LAND HELD FOR DEVELOPMENT

- Land developer in all of our markets
- Investing diligently in supply-constrained markets with strong underlying economic fundamentals
- Strategic land study conducted to review growth patterns in the market in order to determine where future acquisitions should take place
- Acquisition of raw land ideally during the low point of the cycle or when investment opportunities arise
- Acquisition of underutilized land or brownfield development opportunities when investment opportunities arise

Entitlement Process and Develop Land

General Plan

 Designates land use (residential, commercial, office, etc.), school sites and significant roads

- Through strong relationships with the jurisdictions and key stakeholders
 where we operate, we create shared value and infrastructure that supports
 great places. In addition to building homes and community amenities, as
 part of the planning process, we also consider the opportunity for mixed use
 and commercial space within the community to cultivate the live, work and
 play experience many customers desire today
- Obtaining entitlements can be a difficult and lengthy process involving many studies and public engagement, taking years to complete. Once entitlements are achieved, we install infrastructure and either fully service the lots and sell them to homebuilders (Canada/U.S.) or simply grade the lots (U.S.) and sell them to third-party homebuilders
- All underlying costs attributable to each phase of development including costs of the underlying land, consulting costs and backbone infrastructure of major roads, parks and sewers and other associated costs are transferred from Land Held for Development to Land Under Development when on-site servicing commences

Area Structure / Community / Specific Plan

 More detailed look at sequence of development, population density, transportation routes, public utilities and other items the jurisdiction would like to have studied

Land Use / Zoning / Tentative Map Plan

 Designates what is allowed on a specific piece of land and once zoning is in place, no other use of the land will be allowed unless it is re-zoned

Construction / Engineering Approvals

 Detailed drawings outline the location and size of sewers, water and storm pipes, size and location of roads and storm water ponds

Final Map / Legal Survey Plan

Prepared by a land surveyor so that an individual titled lot is created

HOUSING INVENTORY

- Homebuilding may be carried out on a portion of our land and the balance of lots are sold to and built on by third-party builders. Having a homebuilding operation allows us the opportunity to monetize our land and provides us with market knowledge through direct contact with the homebuyers to understand customer desires and product choices
- We are a homebuilder in ten markets (Calgary, Edmonton, Greater Toronto Area, San Francisco Bay Area, Greater Los Angeles Area, San Diego, Hawaii, Denver, Austin and the Washington D.C. Area). Our homebuilding operations are distinctively positioned to provide a variety of housing products, ranging from entry-level to luxury homes, depending on the community and consumer demands
- Certain master-planned communities will also include the development of mixed-use space, consisting of retail or commercial assets, which we will build and add value through leasing, before selling to a third-party operator

^{*} Prior to January 1, 2011, the Company's business practice in Alberta was to not transfer title on its lots sold to the homebuilder who built the home and ultimately sold the home to the consumer, but to wait and transfer title of the lot to the ultimate homebuyer at the time of the home closing. As a result of the change in business practice, 2011 revenue was higher when compared to previous and future periods. In 2011, there were non-recurring revenues and direct costs of sales due to the change in business practice. Single-family lots of 1,043 and Multi-family acres of 19 were non-recurring. This equates to \$189 million of revenues, \$140 million of direct costs of sales and \$49 million of gross margin.
